

SIMUN-LAMP

Floor standing lamp,
built with hydraulic
components and a
demijohn container

Here, Post Design is
interpreted as a
imaginative solution
of reuse, for a very
suggestive result

✳ Photo made by Giampaolo Casagrande

The unmarked images are made by M. G. Villa

This lamp, born from the creative genius and industriousness of Simun, has been slightly reworked and then proposed by Lab-Design. It is built with only used leftovers: a curved water tube, an autoclave lid and the bowl – of an exclusive colour – with which it is built a demijohn. Simun emphasizes that the common factor of the parts used is the liquid element previously contained in them. The SIMUN-LAMP lamp can be quickly disassembled into three pieces and is very easy to reassemble and transport. It looks beautiful like a drop of water running down a tap, it is proportionate in shape and very original in its components. For this reason it will certainly provoke attention and appreciation.

DATA SHEET

Total height 160 cm

Maximum width 50 cm

Pedestal:
diameter 46 cm,
height 13 cm

Glass bowl:
diameter 37,
height 54 cm.

6 led lamps 35 w.

Weight 11 kg

Materials: iron,
glass bowl, led
lamps

Recovery and initial processing on the metal structure of the SIMUN-LAMP

Testing and assembly of the pieces. Anchoring the bowl

Tests for the arrangement of the lamps

Final fittings and positioning of the lamps

SIMUN-LAMP in use in different positions

WHERE DO I PUT IT?

SIMUN-LAMP is a piece of furniture that does not go unnoticed. It can be combined with antique or modern furniture for its essential lines and the shape of its curved stem. It can be placed in receptions, private salons or placed next to art paths, which will help add character with its beauty and originality.

It can be replicated with similar structural elements which will make each piece unique. A different selection of colours can be selected, and it can be chosen to affix the desired logo or brand. The finishing touches will be executed by professional craftsmen.
